

I took a quick look at the latest Best Buy ad and tried to configure the deal of the week to meet minimum specifications. I was not able to get a 3 or 4 year warranty with accidental damage protection so I choose a 2 year plan with accidental damage protection. Also, I could not find a copy of Acrobat Pro for less than \$440, so I shopped for it online and found a copy for \$205. The \$429.99 laptop ends up costing \$1159.30 + \$205 for Acrobat Pro + \$150 annual fee for school software and network resources for a first year total of \$1514.30 with only 2 years of protection. The second, third, and fourth year cost is \$150 a year. The four year total would be \$1964.30.
